

Critical notes and source limitations

Nallino, Part I: front matter and apparatus

S01 v002 — 25 September 2026

These notes belong to the new digital production, not to Nallino's historical prose. The historical reader is a separate artifact. No parallel translation is supplied here.

The complete S01 range has received first-pass transcription or an explicit image/blank disposition. Eleven reading entries remain open. One additional entry documents truncation already present in the frontispiece source. Four inline source-image glyphs avoid asserting unsupported Unicode readings. These qualifications remain attached to the candidate.

Source identifiers are physical pages of the pinned Nallino master, SRC01. Source-line identifiers and exact evidence paths are in the machine-readable ledgers. The reader begins with one modern notice; its page numbering is not the original Roman foliation. Nallino's printed addenda are transcribed and routed, not silently inserted into earlier text.

S01-U001 — AB01-PDF0002

source loss; documented source loss; reader p. 2 **Reading retained.** surviving astronomical panel. The source panel is already cut at top/bottom and lateral edges. Cropping the provider bands cannot recover lost information. **Bounded alternatives.** No reconstruction of the missing edges is proposed. **Source location.** AB01-PDF0002. Rectangle [0.00, 74.88, 597.84, 663.84] PDF points (display rounded); review region. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

S01-U002 — AB01-PDF0018

reading; open reading; reader p. 9 **Reading retained.** المبينة / المثبتة. Consonantal text is retained; exact small shaddah/vowel marks in note 5 remain uncertain. **Bounded alternatives.** المبينة or المثبتة; المبينة or المثبتة **Source location.** AB01-PDF0018-notes_left-L024. Rectangle [0.00, 0.00, 616.80, 887.28] PDF points (display rounded); whole-page region; line-specific coordinates not verified. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

S01-U003 — AB01-PDF0022

reading; open reading; reader p. 13 **Reading retained.** exact source Syriac glyph image. The entire visible Syriac sign sequence is preserved instead of conjecturally supplying Unicode. **Bounded alternatives.** Possible unvocalized bases ܚܐ / ܚܐ; vowel/diacritic encoding not resolved **Source location.** AB01-PDF0022-body-L026. Rectangle [175.00, 492.00, 204.00, 510.00] PDF points (display rounded); review region. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

ܚܐ

S01-U004 — AB01-PDF0040

reading; open reading; reader p. 31 **Reading retained.** زڭ. Persian letter/vowel differentiation remains provisional in the first-pass text; no etymological normalization. **Bounded alternatives.** زڭ / زڭ **Source location.** AB01-PDF0040-notes_left-L020. Rectangle [73.00, 630.00, 303.00, 700.00] PDF points (display rounded); review region. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

S01-U005 — AB01-PDF0040

reading; open reading; reader p. 31 **Reading retained.** βιβλιον. The small Greek accent is not securely distinguished from the scan in the note quotation. **Bounded alternatives.** βιβλιον / βιβλίον **Source location.** AB01-PDF0040-notes_right-L008. Rectangle [0.00, 0.00, 616.80, 889.68] PDF points (display rounded); whole-page region; line-specific coordinates not verified. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

S01-U006 — AB01-PDF0056

formula; open reading; reader p. 47 **Reading retained.** i. e.. The connective between two equivalent forms has a damaged first letter. This does not change the copied formulae. **Bounded alternatives.** i. e. / t. e. (first printed letter damaged) **Source location.** AB01-PDF0056-body-L020. Rectangle [0.00, 0.00, 616.80, 886.32] PDF points (display rounded); whole-page region; line-specific coordinates not verified. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

S01-U007 — AB01-PDF0070

reading; open reading; reader p. 61 **Reading retained.** exact source orthographic sign image. An unsupported special-mark Unicode encoding has been withdrawn. **Bounded alternatives.** ا (alif with waslah) is plausible; separate alif plus unidentified upper sign remains possible **Source location.** AB01-PDF0070-body-L019. Rectangle [281.00, 383.00, 291.00, 402.00] PDF points (display rounded); review region. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

ا

S01-U008 — AB01-PDF0070

reading; open reading; reader p. 61 **Reading retained.** تَلَهُ; تَلَفَاء; تَهَيَّأ; جَزَوْا. Small historical Arabic vocalization marks require further glyph-level comparison; no wholesale modernization of the spelling examples. **Bounded alternatives.** Recorded consonants retained; precise vowel/sign attachment at these examples remains provisional **Source location.** AB01-PDF0070-body-L021. Rectangle [70.00, 380.00, 550.00, 552.00] PDF points (display rounded); review region. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

S01-U009 — AB01-PDF0079

reading; open reading; reader p. 70 **Reading retained.** Subbī / Ṣubbī; الصَّبَاءُ / الصَّبَاءُ. Both sides of Nallino's own corrigendum are preserved. The correction is not silently applied to printed p. XV. **Bounded alternatives.** Latin consonant distinction confirmed; Arabic shaddah/vowel placements provisional **Source location.** AB01-PDF0079-body-L021. Rectangle [0.00, 0.00, 616.80, 891.12] PDF points (display rounded); whole-page region; line-specific coordinates not verified. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

S01-U010 — AB01-PDF0080

reading; open reading; reader p. 71 **Reading retained.** terrestrium / terrestrium. The native crop shows a possible small point in the left lemma. Its status as intended punctuation or stray ink is unresolved; the source-layer encoding is not silently changed. **Bounded alternatives.** The left lemma may be terrestri-um, with a small point or ink mark between i and u; the right is terrestrium. No different word ending is conjectured **Source location.** AB01-PDF0080-body-L026. Rectangle [65.00, 452.00, 380.00, 475.00] PDF points (display rounded); review region. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

S01-U011 — AB01-PDF0082

reading; open reading; reader p. 73 **Reading retained.** two exact source Arabic glyph images. The original and corrected forms in the 175, note 9 entry are retained independently as exact images. **Bounded alternatives.** Tentative encodings واللوال / واللوال are withdrawn; alternative consonantal separation not promoted **Source location.** AB01-PDF0082-body-L005. Rectangle [153.00, 168.00, 219.00, 183.00] PDF points (display rounded); review region. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

والسلول واللول

S01-U012 — AB01-PDF0084

reading; open reading; reader p. 75 **Reading retained.** vocalized Arabic two-line verse. The first hemistich is placed on the right as in the source. No normalization based on the accompanying Latin translation. **Bounded alternatives.** Consonantal verse retained; vowel placements in تَدُلُّ / تَمُرُّ and final case-vowels remain provisional **Source location.** AB01-PDF0084-body-L028. Rectangle [0.00, 0.00, 616.80, 886.56] PDF points (display rounded); whole-page region; line-specific coordinates not verified. **Disposition.** unresolved; source image retained. No critical emendation is adopted. The Arabic authorial canon is unchanged.

Repairs, historical corrections and verification

The 28 recorded proof-repair or encoding decisions affect 25 distinct source lines relative to the preserved first-pass snapshot. They correct the digital transcription, not Nallino's historical claims. Every changed line has a repair identifier and a before/after record. Transient image fallbacks later resolved remain in the history.

The 86 printed addenda/corrigenda entries have the status REGISTERED_NOT_APPLIED. References into later sessions are routing records only. No later-session text has been transcribed or changed here.

Two clean two-pass builds of the historical reader are byte-identical. A separate read-only executable checks source identity, coverage, assets and builds. It was authored in the production session and is not an independent philologist. The producing assistant inspected source and reader proofs; an independent cold source/reading audit has not been performed. No human-only certification requirement is introduced. S01 remains a candidate, not a closed session.

The line-alignment ledger distinguishes page/section anchors from rectangles estimated using embedded-text similarity. Such rectangles are locator candidates, not certified measurements of every historical line. Native image-crop coordinates and pixel-equality tests are recorded separately.
